

SC Connector Family

A Complete Fiber Optic Connector Solution

Product Family Description

OFs offers a complete family of fiber optic products featuring the SC Connector. The SC Connector, with its familiar push-pull insertion release mechanism, is standard in most fiber applications and well known to craft personnel.

The product line consists of multimode and single-mode simplex, duplex and quad jumpers; pigtails; simplex and duplex adapters; single-mode and multimode field mountable SC Connectors; tools and consumable kits. The family also includes attenuators, terminators, connectorized cables, angled jumpers, and adapters. All of the accessory mounting panels for the Lightguide Interface Unit (LIU) and the LGX® Fiber Optic Distribution System are also part of the SC Connector Family. The SC Connector is Telcordia (formerly Bellcore), ANSI/EIA/TIA and IEC compliant.

SC Connector Product Family

- Field mountable connectors
- Jumpers: simplex, duplex, quad, angled connectors, hybrids
- Pigtails
- Connectorized cables
- Preterminated shelves
- Terminated angled SC Connectors
- LIU and LGX Panels
- Simplex and duplex adapters
- Attenuators
- Tools and consumable kits

Applications

- CLEC
- LECs
- Broadband/CATV

Benefits:

- Reduces assembly time and simplifies training
- Easy-to-install adapters and connectors
- Can be used in multiple applications including desk/workspace
- Maintains optical contact under load, and helps prevent accidental disconnects
- Helps minimize transmission problems
- Optimizes optical contact

SC Connectors

Connector Description

The SC Connector is an easily field mountable connector that is designed to mount on 900 micron buffered fiber, 1.6 mm jacketed cable and 3.0 mm jacketed cable. It can be mounted on bare fiber but it is recommended that the fiber be buffered first using the D181755 kit or equivalent. The connector utilizes a zirconia ferrule for fiber alignment; and push-pull hardware for installation into the adapter. It can be used in high density applications and not be affected by axial cable loads. The cable is crimped to the outer hardware and therefore prevents momentary disconnect when axial load is placed on the cable. The 1032B5 Tool Kit contains all the tools and instructions needed to mount SC Connectors. The new Mini-Tool kit is available for mounting the connectors using the EZ method.

OFS has created an unusually stable design for the SC Connector enabling us to offer our customers this environmentally stable product. OFS continues to innovate with material qualities, ferrule specifications, and state-of-the-art manufacturing processes along with cutting edge research and development.

Connector Features

- Snap-in connector design
- Rugged and adaptable compared to other connectors
- Stable performance
- Pull-proof design
- Tunable

* The 2A1 clip COMCODE 106 917 263 is needed to connect two simplex connectors in a duplex configuration.

SC Adapters

Adapter Description

OFS offers SC Adapters in a variety of configurations. The adapters are easily mounted by simply snapping them into a panel. The blue simplex adapter is the C6000A-4. It can mate both multimode and single-mode connectors. The beige simplex multimode adapter uses a metallic sleeve and should only be used for multimode connectors. There is a wide range of duplex adapters in both single-mode and multimode configurations. Single-mode adapters may be used for both single-mode and multimode connectors, while multimode adapters should only be used for multimode applications. The 6070A-4 adapter allows a duplexed SC connector to be mated with two ST connectors. OFS also offers angled adapters in a distinctive green color per industry standards.

SC Terminators

Terminator Description

The SC Terminators from OFS are designed to reduce back-reflections typically found on laser-activated, connectorized access points such as those found on splitters, DWDM couplers, or LGX Fiber Distribution Frames. Any single fiber connector mated to an adapter or coupling that is unused is a source of back-reflection. Back-reflection can be a major cause of bit errors. OFS terminators are operational between 1310 and 1550nm and provide a reflectance of -45 dB.

SC Jumpers

Jumper Description

OFS offers an extensive line of fiber optic jumpers. The push-pull mating of the SC configuration allows the connector to be easily engaged and disengaged. On multimode duplex jumpers, the 2A1 clip is added in the factory to maintain the transmit/receive position of the simplex plugs.

The SC Jumpers are available in both 3.0 mm and 1.6 mm diameter cordage. The 1.6 mm cordage, the smallest in the industry, allows greater jumper density in a fully loaded frame and prevents congestion in overhead racks or building risers. A duplex jumper made from a figure-eight MiniCord® Cordage does not require a bulky bifurcation joint thereby saving space in the frame. The duplex MiniCord jumper can be peeled apart with ease so that two cords can be installed as one, then easily separated into two, saving time and effort. The single-mode cordage uses OFS depressed clad fiber providing excellent bend loss performance. The bend radius permits you to install jumpers or jumpers in spaces with limited maneuverability or around sharp corners. Quad jumpers utilize four color-coded 1.6 mm cords combined in one jacket.

Jumpers are tested and must meet a maximum insertion loss of 0.3 dB. Field terminations using proper procedures should yield similar results. Jumpers come in fixed lengths or can be ordered in custom lengths. Hybrid jumpers are also available.

Angled SC Jumpers

The Angled SC Connector is designed to mount on 900 micron buffered fiber, 1.6 mm jacketed cable and 3.0mm jacketed cable. The connector utilizes a zirconia ferrule for

fiber alignment, and push-pull hardware for installation into the adapter. The connector can be used in high-density applications while not being affected by axial cable loads.

Custom Jumper Ordering

Order Form Structure:

Line 1: Enter the E/W COMCODE with quantity of jumpers desired

Line 2: Enter the E/W cordage type COMCODE and the total footage of cordage needed to make all of Line 1

Example: To get 7 special length (21 feet) SC to SC multimode simplex MiniCord jumpers.

Line 1: 107 671 125 ML1SC-SC-E/W • Quantity 7
 Line 2: 107 132 714 LGMC-001B-LRX Quantity 147 feet (7 X 21')

Custom JumperCordage Types (Combine with Zero Length Jumper Code)

Fiber Type	Fiber Count	Cordage Size	Description	COMCODE
Multimode	Simplex	3.0 mm	9860A3	106 762 362
Multimode	Duplex	3.0 mm	9861A3	106 762 370
Multimode	Simplex	1.6 mm	LGMC-001B-LRX	107 132 714
Multimode	Duplex	1.6 mm	LGMC-002B-LRX	107 132 706
Single-mode	Simplex	3.0 mm	9000A3	106 704 703
Single-mode	Duplex	3.0 mm	9001A3	106 704 729
Single-mode	Simplex	1.6 mm	LGMC-001B-SRX	107 132 698
Single-mode	Duplex	1.6 mm	LGMC-002B-SRX	107 132 672

Custom Length SC Hybrid Jumper Codes
